Part Number: AOSCG84009

Date: May 15, 2012

Cyclone® 400 Gas Valve Change

Beginning May 15th the BTH-400(A) model will incorporate a design change to the gas valve. This change only impacts the BTH-400(A) model in natural gas configuration. This will result in a Series change from 100 to Series 104. The primary difference between the new and old designs is the manufacturer of the gas valve and style of the gas valve. The new system uses a zero governing regulator in the gas valve which also requires a Venturi insert in the blower intake. This change also impacts other part number changes that are reflected on the new Series 104 parts list.

If you have any questions on these product changes please contact me at 615.792.6280.
