Commercial Gas Multi-Flue Transition from BTN to BTL in Texas

The commercial multi-flue BTN model line is being replaced with the BTL for sale in Texas. The new BTL design has many impressive features and is offered in ten non-ASME and five ASME configurations.

The BTL is designed to be an easy replacement for older competitive models and future BTN replacements. Some key features include:

- Top, front and rear water connections
- HydroCannon front inlet self-cleaning device
- Factory shipped with pipe nipples and plugs
- New 80 gallon 199K model
- Shorter overall height on popular 199 model
- Spark to pilot ignition
- New design burner box with bottom mount induced draft blower

The specification sheet and installation manual for these new models are available online at www.hotwater.com.

Please do not hesitate to contact me or you're A. O. Smith Sales Representative with any questions or for further details.
