A. O. Smith ProMax[®] 40 and 50-Gallon Power Vent Gas Water Heaters

We are pleased to announce the launch of the new 40 and 50-gallon short model A. O. Smith ProMax ENERGY STAR[®] Power Vent water heaters.

These new GPVL 40 and GPVL 50 (Series 200/201) models are ENERGY STAR qualified and offer the highest efficiency in this category available on the market today - with an Energy Factor (EF) of 0.70! These 40,000 BTU/h models are available for both natural gas and propane and are built on a newly designed Power Vent product platform that utilizes the latest blower, gas control and ignition system technologies.

Other features of these new models include:

- Exclusive 3-position (9, 12, and 3 o'clock) rotatable blower with front-mounted junction box
- Hot-surface ignition
- 120V electronic gas control
- Certified for ABS, PVC, and PP (polypropylene) vent material
- Vent lengths up to 125 equivalent feet with 3" diameter venting (180 equivalent feet with 4" diameter venting)

These new short models are available for immediate purchase. The specification sheet and installation manual for these new models is available online at www.hotwater.com. Additional copies of the specification sheet can be ordered online at www.hotwater.com/onlinelit.

Please do not hesitate to contact me or your A. O. Smith Sales Representative with any questions.

Sincerely,

A handwritten signature in cursive script that reads 'Patricia S. Kirchner'.
