New ProMax[®] Ultra-Low NOx Direct Vent Gas Water Heaters

We are pleased to announce the addition of two Ultra-Low NOx Direct Vent model water heaters to our residential specialty vent gas product offering.

Newly released are the 40 and 50-gallon ULN-compliant Direct Vent models. These water heaters' model numbers are GDNL-40L and GDNT-50L respectively. Both models utilize the ULN burner and combustion chamber designs currently used on our ULN atmospheric vent products.

Other features of these new models include:

- Honeywell™ gas control
- Inconel alloy and stainless steel ULN burner construction
- Altitude rating up to 5,400 feet
- 3"-5" coaxial concentric vent system

The specification sheet and installation manual for these new models will be available online at www.hotwater.com. You can order additional copies of the spec sheet at www.hotwater.com/onlinelit.

Please do not hesitate to contact me or your A. O. Smith Sales Representative with any questions or for further details.

Sincerely,

A handwritten signature in cursive script that reads "Patricia S. Kirchner".
