New A. O. Smith Voltex® Hybrid Electric Heat Pump Water Heaters

A. O. Smith is excited to announce the launch of their next generation of residential heat pump water heaters. The new HPTU-50, HPTU-66, and HPTU-80 models will replace the existing SHPT platform. They continue to provide the great features of the SHPT line including a 10-year limited warranty. The new models offer higher performance and efficiency than the SHPT line for even greater savings and are dual voltage 208/240 VAC capable.

The full product range combined with market leading performance and efficiency makes these products an excellent choice for almost any residential installation.

Model (click for details)	Gallon Capacity	Energy Factor (Hybrid Mode)	Annual Cost of Operation**	1 st Hour Rating (Gal) (Hybrid Mode)
HPTU-50	50	3.24*	\$163	70*
HPTU-66	66	3.17*	\$166	80*
HPTU-80	80	3.06	\$176	95*

**Best in market!*

**In Hybrid Mode, using DOE EnergyGuide test at national average electric cost of \$0.12 per kWh

Other key features include:

- Energy Star® qualified – eligible for many state and local utility incentives, making payback even quicker
- Quietest heat pump water heaters on the market, operating at just 51dBa
- Easy to use electronic interface, controlling set point and operating modes designed to match efficiency with hot water needs
- Money saving vacation mode, programmable up to 99 days
- 208/240 VAC 60Hz capable
- 10 year limited tank and parts warranty

The new HPTU-50, HPTU-66, and HPTU-80 heat pump specification sheet, installation manual, and price slip sheet are attached and may also be found online at hotwater.com.

Should you have any questions, please feel free to consult your A. O. Smith Sales Representative or contact me.
