New A. O. Smith High Efficiency Condensing Tankless Water Heater

A. O. Smith is pleased to announce the launch of our new condensing tankless water heater that expands our current condensing tankless family. This new water heater is rated at 120,000 BTU/H and is a high-efficiency alternative for the low BTU/H non-condensing water heaters currently on the market.

Our new product is well suited for 1-2 bath homes depending on incoming water temperature and is the most economical tankless option for retrofit applications.

This new tankless water heater is available in indoor or outdoor models and can operate on natural gas (NG) or liquid propane (LP).

Other key features include:

- ENERGY STAR® qualified – eligible for many state and local utility incentives, making payback even quicker
- Operates on ½" gas supply line with normal gas pressures
- Vents with 3" Schedule 40 PVC up to 70'
- Temperature controls built into the front panel
- Industry leading 15-year limited warranty on the heat exchanger

Our new A. O. Smith high efficiency condensing tankless water heater is available for immediate order. The specification sheet, installation manual, sale sheet are attached but can also be found online at www.hotwater.com.

Should you have any questions, please feel free to contact me or consult your A. O. Smith Sales Representative.

Sincerely,

Jeff Ogan
