New Vertex™ 100 Line of High-Efficiency Condensing Gas Water Heaters

We are pleased to announce the launch of the new series of Vertex 100 High-Efficiency Condensing Gas water heaters and introduce the new member of the Vertex family – the 75G Vertex 100.

The new GDHE 50 and GDHE 75 (Series 130/131) models continue to provide hot water with 96% thermal efficiency; are ENERGY STAR® qualified and Ultra-Low NOx compliant. Both models can be ordered as natural gas or propane; and are based on our proven top-fired condensing gas product platforms.

Other features of these new models include:

- Heavy-Duty Anodic Protection
- Direct spark ignition
- Standard ½" gas connection
- Standard side connections
- Certified for ABS, PVC, CPVC, and polypropylene vent material
- Vent lengths up to 128 equivalent feet with 3" diameter venting

The new series of 50G models will be supplied once inventory of the current series models is depleted. The new 75G models are available for immediate purchase. The specification sheet and installation manual for these new models are available online at www.hotwater.com.

Please do not hesitate to contact me or your A. O. Smith Sales Representative with any questions or for further details.

Sincerely,

Patricia L. Kirchner
